

# BioMat™

## A Unique Combination of Three Energy Therapies

### Far Infrared Rays (FIR)

Far Infrared (FIR) is a form of energy that is part of the electromagnetic light frequency of sunlight that is invisible to the human eye. Scientists propose that it is the most beneficial electromagnetic energy available. These rays not only benefit the muscles on the surface of the body, but all cells including blood vessels, lymph glands, and nerves in the deepest part of your body.

### Amethyst

Amethyst is "nature's super conductor" in that it has been found to give the most powerful delivery of beneficial far infrared light waves into the human body. The BioMat's™ Far Infrared Rays penetrate 6-8 inches into the human body unlike most infrared saunas which only penetrate the body 1.5 to 2 inches.

### Negative Ions

The BioMat™ is purported to generate a direct conduction of negative ions into the body and transforms positive ions to negative ions. This process changes the acidic condition of the body to alkaline which is its natural healthy state.

Guthrie Chiropractic & Massage  
235 W. 10th Ave.  
Eugene, OR 97401  
Ph: (541)683-9069  
Fax: (541)431-7001

## BioMat™ Far Infrared Therapeutic Treatment System

U.S. FDA Medical Device: 2954299

### Eases Joint Pain & Stiffness

Infrared heat therapy is widely used to treat patients suffering from many forms of arthritis. In addition, it has proven effective in the treatment of sprains, neuralgia, bursitis, muscle

spasms, joint stiffness and many other muscular-skeletal ailments.

### Improves the Immune System

Far Infrared's deep heat raises your body temperature, inducing an artificial fever. As it works to combat the "fever", your body's immune system is strengthened.

### Removes Toxins

Increased blood circulation stimulates the release of built-up toxins and waste. Daily sweating can help detoxify your body as it rids itself of an accumulation of potentially carcinogenic compounds such as mercury and lead.

### Increases Blood Circulation and Strengthens Cardiovascular System

FIR activates enzymes that stimulate the production of Nitric Oxide which effects blood vessel dilation and neurotransmission. The more nitric oxide produced in arteries, the more the arteries increase in diameter and blood pressure falls.

### Speeds Recovery

The deep heat of Far Infrared helps peripheral blood vessels dilate, bringing, relief and healing to muscle and soft tissue injuries. Increased blood circulation carries off metabolic waste products and delivers oxygen-rich

blood to oxygen-depleted muscles, so they recover faster.

### Burns Calories and Controls Weight

As you relax with the gentle heat of the far infrared, your body is actually hard at work, producing sweat, pumping blood and burning calories. According to a Journal of the American Medical Association report, in a single Infrared Ray session you may burn as many calories as you would rowing or jogging

for 30 minutes. So you lose weight - not just water.

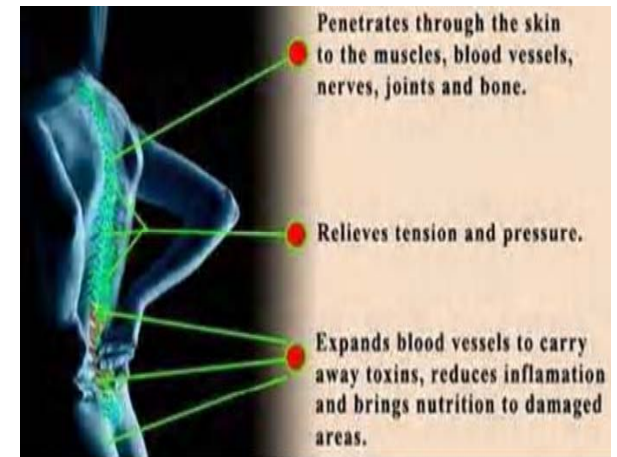

### Reduces Stress and Fatigue

The gentle warmth of Far Infrared gives you an overall massaging effect, soothing jangled nerves and knotted muscles. You'll feel rejuvenated, renewed, and restored.

BioMat™ is unique in that it blocks the harmful EMF (Electro Magnetic Frequency) waves by converting AC current to DC current, which is bio-electrically compatible with the human body. Heating pads and infrared saunas utilize 120V AC current which has been proven to be highly detrimental to human health.

## Benefits of Far Infrared Therapy

- As the molecules of your cells are illuminated with far infrared light rays of the same "frequency" it actually boosts your cellular metabolism and microcirculation
- It can also promote the elimination of poisons, carcinogenic heavy metals and other toxic substances that the body encapsulates in water molecules and stores in the subcutaneous fat cells.
